

Instructions for Setting up the Golf Guru 4 for Road Navigation Software

- 1) Insert your RoadNav SD card into the SD card slot on the Guru 4.
- 2) Power up the Guru 4. It should come up on the “Programs” screen.

- 3) Tap the “Settings” icon with your finger or stylus. You should see the Settings screen below. Tap the “App. Setup icon”.

- 4) Tap the directory icon  next to the Navigation line which is the second line.

- 5) You will now see a screen that shows a "NANDFlash" folder, and a "StorageCard" folder.

- 6) Double tap the “StorageCard” folder with your finger or stylus. This will open up the folder.
- 7) Double tap the folder named “MobileNavigator”. This will open up that folder.
- 8) Double tap the file named “MobileNavigator.exe”.
- 9) You will now be returned to the Path screen. Tap the red X at the top right of the display, tap the red X again.
- 10) This will return you to the “Programs” screen. Now, when you tap the “Navigation” icon, your road navigation software program will come up.
- 11) Congratulations, you are done!
